Item 4 Advisory Business

Firm Description

Beacon Financial Advisors, LLC, ("Beacon" or the "Advisor) was founded in 2002, and its principal owner is Kristine McKinley.

We offer investment advisory services, specifically Financial Planning Services or other Financial Consultations. Our Financial Planning and Financial Consultation Services aim to address the many needs of clients, including, but not limited to the following Financial Planning Services and Financial Consultations:

- Comprehensive Financial Planning
- Cash Flow Analysis
- Current Portfolio Reviews or Analysis
- Portfolio Allocation and Investment Recommendations
- Estate Planning Reviews
- Retirement and Capital Needs Analysis
- Insurance Reviews
- College Education Funding
- Income Tax Planning

Our investment advisory services are tailored to the individual needs of clients. We tailor our services to the needs of the client through personal consultations and conversations during which we assist the Client in selecting the services that are appropriate to their needs. The initial meeting, which may be by telephone, is considered an exploratory interview to determine the extent to which financial planning and consultation may be beneficial to the client.

Although we do not implement securities transactions for clients, clients may impose reasonable restrictions on any recommendations we provide to them, such as on specific securities or types of securities. Investment recommendations are an integral part of our financial planning services. Investment recommendations are provided, with the client making the final decision on investment selection. Beacon Financial Advisors, LLC does not act as a custodian of client assets. The client always maintains asset control. Beacon Financial Advisors, LLC does not place trades for clients.

A written evaluation of each client's initial situation is provided to the client, often in the form of a net worth statement. Periodic reviews are also communicated to provide reminders of the specific courses of action that need to be taken. More frequent reviews occur but are not necessarily communicated to the client unless immediate changes are recommended.

Other professionals (e.g., lawyers, accountants, insurance agents, etc.) are engaged directly by the client on an as-needed basis. Conflicts of interest will be disclosed to the client in the unlikely event they should occur.

We do not participate in any wrap fee programs, nor do we manage client assets.

Item 5: Fees and Compensation

Description

Our fees for services are charged at an hourly rate of \$180.00 per hour for Financial Planning and Financial Consultation Services. These billing rates are subject to change upon written notice to you.

Fee Billing

At the time you sign our Client Service Agreement we will provide an estimate to you of the number of hours we anticipate the selected services to take. For financial planning and financial consultation services, you agree to submit a deposit of the lesser of \$500 or payment for one half of the number of anticipated hours at the hourly rate of \$180 per hour for the selected services listed above upon signing of this Agreement. The balance of actual fees for services provided will be due and payable to Beacon immediately upon presentation of recommendations to you. Beacon will invoice you for the amount of fees for any services performed. Payment of such invoices shall be made within thirty (30) days of the date of the invoice. Accounts not paid within thirty (30) days are subject to interest charges to the extent permitted by state law.

Other Fees

Should you choose to implement our recommendations, you should note that there are other fees and expenses you may pay in connection with investing. You will incur brokerage and other transaction costs including internal expenses associated with specific securities. Although we aim to make recommendations of securities and custodians (if requested) with lower

associated costs and fees, you should review the custodial agreement and any offering documents carefully so that you understand these associated costs. We do not implement financial plans on your behalf, and do not share in any fees charged to you for the implementation of the plans. There may be investments and custodians available at a lower cost than those we recommend.

Mutual funds generally charge a management fee for their services as investment managers. The management fee is called an expense ratio. For example, an expense ratio of 0.50 means that the mutual fund company charges 0.5% for their services. These fees are in addition to the fees paid by you to Beacon and are disclosed in the prospectuses of the mutual funds.

Performance figures quoted by mutual fund companies in various publications are <u>after</u> their fees have been deducted.

Past Due Accounts and Termination of Agreement

Beacon Financial Advisors, LLC reserves the right to stop work on any account that is more than 60 days overdue. In addition, Beacon Financial Advisors, LLC reserves the right to terminate any financial planning engagement where a client has willfully concealed or has refused to provide pertinent information about financial situations when necessary and appropriate, in Beacon Financial Advisors, LLC's judgment, to providing proper financial advice. Either Beacon or the Client may terminate their Client Services Agreement at any time, in writing. If the Client Services Agreement is terminated by either party, all fees due at the time of termination will be due and payable to Beacon or the Client will receive an immediate refund of any unearned pre-paid fees. If the Agreement is terminated within five business days of signing, the Client will receive a refund of all pre-paid advisory fees.

Item 6: Performance-Based Fees

Sharing of Capital Gains

Fees are <u>not</u> based on a share of the capital gains or capital appreciation of managed securities.

Beacon Financial Advisors, LLC does not use a performance-based fee structure.

Item 7: Types of Clients

Description

Beacon Financial Advisors, LLC generally provides investment advice to individuals, trusts, estates, or charitable organizations, corporations, or business entities. We have no minimum account size and no minimum fee. Client relationships vary in scope and length of service.

Item 8: Methods of Analysis, Investment Strategies and Risk of Loss

Investing involves risk that clients should be prepared to bear.

Methods of Analysis

Security analysis methods may include fundamental analysis.

The main sources of information include financial newspapers and magazines, inspections of corporate activities, research materials prepared by others, corporate rating services, timing services, annual reports, prospectuses, filings with the Securities and Exchange Commission, and company press releases.

Other sources of information that Beacon Financial Advisors, LLC may use include Morningstar Principia mutual fund information, Morningstar Principia stock information, Charles Schwab & Company's "Schwab Link" service, Advisor Intelligence, and the World Wide Web.

Investment Strategies

The investment strategy for a specific client is based upon the objectives stated by the client during consultations and may include long-term purchases and/or short-term purchases.

Risk of Loss

All investment programs have certain risks that are borne by the investor. Our investment approach constantly keeps the risk of loss in mind. Investors face the following investment risks:

- Interest-rate Risk: Fluctuations in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- Market Risk: The price of a security, bond, or mutual fund may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic, and social conditions may trigger market events.

- Inflation Risk: When any type of inflation is present, a dollar today will
 not buy as much as a dollar next year, because purchasing power is
 eroding at the rate of inflation.
- Currency Risk: Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- Reinvestment Risk: This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e., interest rate). This primarily relates to fixed income securities.
- Business Risk: These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from a steady stream of customers who buy electricity no matter what the economic environment is like.
- Liquidity Risk: Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- Financial Risk: Excessive borrowing to finance a business' operations increases the risk of profitability, because the company must meet the terms of its obligations in good times and bad. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.

Item 9: Disciplinary Information

The firm and its employees have not been involved in legal or disciplinary events related to past or present investment clients.
